HEAT

'Beating and grinding the metal into the desired form we burn our eyes sore and sometimes even risk to loose a finger or two'.

Heat Stove 01 started out as part of his exams in 2008 and was painstakingly developed-part by part-in the course of two years. The perfectly finished product proudly displays Aart van Asseldonk's signature.

DECOR

A vista into the choir. All original seats were removed from the church; to the dismay of some church goers who had to sit in the decor Van Asseldonk had erected in the nave for the duration of Dutch Design Week 2015.
